THE ARABESQUE COLLECTION

THE ARABESQUE COLLECTION

*A Blend Of Traditional
Arabic Design
And Contemporary Aesthetics*

INTRODUCING: TREDEX X KARIM RASHID

Introducing the Arabesque collection,
a collaboration with the visionary, Karim Rashid.

The Arabesque collection, embodies a harmonious blend of traditional Arabic design and contemporary aesthetics. Inspired by the intricate patterns of Arabic windows and the soothing forms of nature, Arabesque transforms your bathroom into a luxurious sanctuary.

We believe the bathroom is a sacred space for mental rejuvenation and resetting. Arabesque offers contemporary designs that cater to your need for tranquility and privacy, helping you slow down, reengage your senses, and reconnect with your body. Experience the beauty of light and form with architecture-inspired faucets and mixers that mimic the elegant shapes of traditional windows, enhancing the poetic forms of the Middle East. Proudly crafted to the highest standards, the Arabesque collection blends Karim Rashid's visionary design with TREDEX's commitment to quality and innovation.

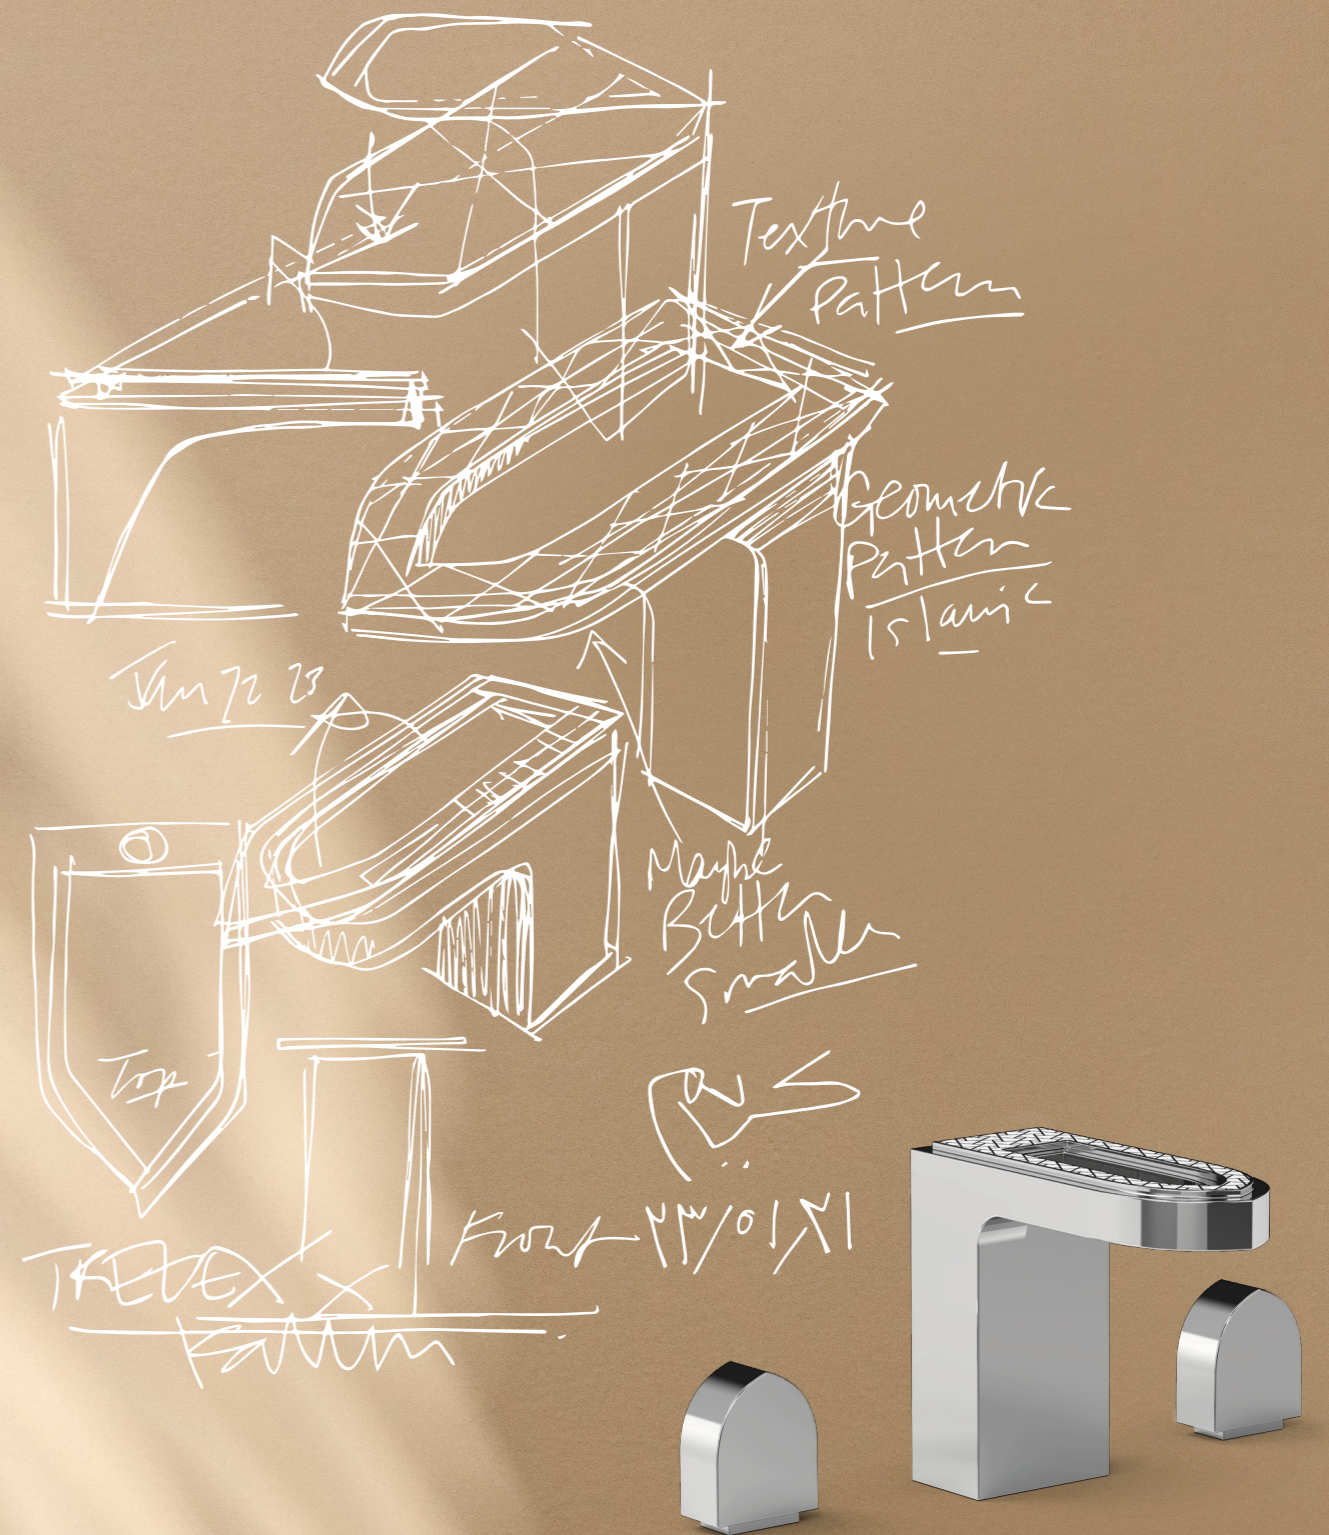

MEET KARIM

With over 4000 designs, 400 awards, and global acclaim, Karim Rashid's innovative spirit shines through in this collection, making it a standout in modern sanitaryware. The Arabesque collection draws from traditional Arabic window patterns, creating mesmerizing shadow play with sunlight, combined with nature's organic shapes for a calming aesthetic.

"The bathroom has become the sacral spiritual refuge for mental health, especially in hotels, homes, and spas. We are moving towards better-designed bathrooms and more contemporary aesthetics which meet our needs for rejuvenation, privacy, relaxation, and getting away from the world. It is a time to slow down and enjoy being in the moment, to reengage your senses and get back in touch with your body - your temple in this life.

With that intention, I designed the Arabesque collection for TREDEX. Digitally derived Arabesque lines, infinite geometric patterns, and nature transformed into ornamentation are all integral to the collection."

Karim
